

ARUN LAL M

SOFTWARE ENGINEER | BACKEND & FULL STACK

TRIVANDRUM, KERALA, INDIA

+91 8301073565 | arunlal.m2000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer with 2+ years of experience architecting distributed backend systems, real-time architectures, and highly scalable cloud applications. Proven expertise in engineering RESTful microservices (Node.js/Django), optimizing databases for high availability (PostgreSQL/MongoDB), and implementing end-to-end CI/CD observability pipelines (Docker/AWS/GitHub Actions). Adept in cross-functional Agile collaboration, system design, and driving measurable performance enhancements for enterprise-grade solutions.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, Bash, HTML, CSS

Backend & Architecture: Node.js, Express.js, Django, REST APIs, GraphQL, gRPC, Microservices, Socket.IO, System Design

Frontend: React, Next.js, Tailwind CSS, SSR, Streamlit

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, Query Optimization, ORM, Mongoose

DevOps & Cloud: AWS (EC2, S3, ECR), Docker, Kubernetes, Terraform, CI/CD pipelines, GitHub Actions, PM2, Nginx, Vercel

Security: JWT, OAuth, RBAC, CSRF Prevention, HMAC Webhook Verification

Monitoring: Prometheus, Grafana, Centralized Logging (ELK Stack)

Integrations: HyperPay, Razorpay, Firebase Cloud Messaging, Nodemailer, Strapi CMS, Google Gemini API

Tools & Practices: Git, Linux, Postman, Agile/Scrum, Code Review, Infrastructure as Code (IaC), TDD

EXPERIENCE

Full Stack Developer — *Globify Software Solutions*

Sept 2024 – Mar 2026

- Architected scalable, real-time enterprise platforms using Node.js, Express 5, and Django, with Socket.IO and Redis Pub/Sub synchronizing room bookings and live orders across 7 role-based dashboards.
- Established a PCI-compliant HyperPay payment gateway with HMAC webhook verification, enabling secure tokenized checkouts within ERP applications.
- Containerized services with Docker and CI/CD pipelines via GitHub Actions on AWS EC2/S3, maintaining 99.9% uptime with zero-downtime deployments.
- Provisioned infrastructure using Terraform, managed Linux VPS environments with Nginx for SSL/TLS load balancing, and enforced HTTP-only JWT token rotation across APIs.

Full Stack Development Intern — *MashupStack*

Oct 2023 – Jul 2024

- Crafted responsive React frontends and Django REST Framework backends for live production workflows.
- Enhanced PostgreSQL and MySQL schemas via strategic indexing and ORM tuning, reducing API response latency by 40%.
- Configured AWS S3 for secure file storage and granular Role-Based Access Control (RBAC) with page-level permissions.

PROJECTS

ISRO-VSSC — Certification Operations Portal [\[Link\]](#)

- Created a monolithic N-level QA workflow engine in Python and Django to track 229 aerospace products through multi-tier approval chains, with a polymorphic GenericForeignKey approval system and audited PDF generation via WeasyPrint.

- Smana Al Raffa — Hotel Platform (Booking Website, PWA Admin Panel & Guest Mobile App)** [\[Link\]](#)
- Built an SSR Next.js website with slug-based routing backed by Strapi v5 Headless CMS, covering rooms, restaurants, tours, facilities, offers, and gallery pages; embedded SwiftBook for PCI-compliant off-server booking transactions.
 - Engineered a real-time hotel management platform with a Next.js 16 PWA admin panel, Express 5 REST API, and Flutter guest mobile app, synchronizing reservations, room status, and service workflows across all devices.
 - Implemented Socket.IO with Redis Pub/Sub for live updates across 5 role-based dashboards (Admin, Manager, Receptionist, Housekeeping, Chef); integrated HyperPay tokenized payments, Firebase Cloud Messaging notifications, and automated cron-based checkout/cleanup jobs.

- TRINS — Trivandrum International School Portal**
- Developed an SEO-optimized Next.js SSR application with Framer Motion and GSAP animations; configured API route handlers for direct SMTP email delivery without a dedicated middleware server.

- YouTube Video Translator — AI-Powered Streaming App** [\[Link\]](#)
- Launched a Streamlit app for real-time YouTube transcript translation into 10+ languages via the Google Gemini LLM API, with an SQLite caching layer reducing latency from 15 seconds to 5 milliseconds and cutting redundant API costs.

- DevOps Infrastructure & Cloud Observability Architecture**
- Designed and automated AWS/GCP cloud infrastructure using Terraform and Ansible, built CI/CD pipelines with Jenkins, GitHub Actions, and Git Lab, containerized applications with Docker, deployed workloads on Kubernetes and Helm, implemented Git-Ops with Argo-CD, and configured Prometheus, Grafana, Loki, and Alloy for production monitoring and observability, leveraging GitHub Copilot and Amazon Q for AI-assisted automation.

EDUCATION

B.Tech in Computer Science — University College of Engineering Kariavattom	2019 – 2023
Higher Secondary Certificate — St. Joseph’s HSS, Trivandrum	2017 – 2019
High School Certificate (SSLC) — Govt. Model BHSS Thycaud, Trivandrum	2016 – 2017

CERTIFICATIONS

Advanced DevOps with AI — Udemy	2026
AWS Cloud Essentials — AWS	2026
React/Python Full Stack — Mashup Stack	2023 – 2024

LEADERSHIP & EXTRACURRICULARS

- Promoted to **Acting Team Lead and Software Developer** within one year at Globify, leading system design reviews, cross-team debugging, and mentoring 2 junior engineers within Agile sprints.
- Served as **Platoon Commander** in the National Cadet Corps (NCC) and active **Volunteer** with the National Service Scheme (NSS), leading battalion-level training and community outreach initiatives.
- Competitive college **Volleyball** and **Badminton** player, avid strategy and RPG gamer, sharpening analytical and decision-making skills.
